PRO-5
COMPACT RUGGED CAST DESIGN
SINGLE AXIS JOYSTICK CONTROLLER
FOR HARSH ENVIRONMENTS

PRO-5 – Single axis cast housing joystick
PRO-5H – Single axis cast housing Hall-effect joystick
PRO-5B/B – Single axis cast housing bang / bang joystick

Construction:
The cast housing construction of the PRO-5 is suitable for use in wet and dirty environments. The PRO-5 provides precise proportional control for electro-hydraulic valves and AC/DC variable speed drives. Your specific control requirements can be accommodated by a variety of standard and custom engineered configurations.

The versatile design of the PRO-5 accommodates a variety of handle options including mechanical interlock and lever actuated deadman as well as proportional and discrete outputs including; 11A snap action switches, potentiometers, Hall-effect, PWM, CAN Bus, and bang / bang.

Application:
This weatherproof design is ideal for use on scissor lifts, work platforms, bucket trucks, cranes, agricultural, mining and forestry equipment where control of electro-hydraulic proportional valves or variable speed drives is desired.

Features:
- Rugged cast construction
- Gasketing for outdoor use with blind mounting hardware
- Versatile design
- Long life, compression type return spring system
- 20 Million cycle mechanical operating life
- Rugged 10mm diameter handle shaft
- Tooled fixed cams

Options:
- Multiple mounting systems (mounting holes are interchangeable with other popular controllers, on request)
- Friction held handle
- Large variety of optional handle configurations including; deadman and mechanical interlock options
- Large selection of proportional outputs including potentiometer, Hall-effect, PWM and CAN bus
- Hall-effect output meets or exceeds CE EMC Requirements
PRO-5 BANG / BANG ORDERING INFORMATION

Drive Arrangement: Single axis cast housing
Basic Assembly: 5.25” handle height off of panel and cast housing supplied standard
Handle: 1.25” diameter round ball
Handle Action: Spring return
Output: Bang / bang
Output Devices: 11A snap action switch

Environmental:
- Operating Temperature: -25 to +70° C
- Storage Temperature: -40 to +70° C
- Protection above the panel: IP66

PRO-5 Bang / Bang Technical

Mechanical:
- Mechanical Life: 20 million cycles
- Gear Ratio: 3.5:1
- Detented Positions: Up to 1-0-1 maintained
- Handle Travel: ±20°

Electrical:
- Contacts: 11A 125, 250 VAC Form C V series snap action switch (4 max.) with .187” quick connect tab

Options:
- Handle: See handle section for a selection of handle options
- Handle Action: Maintained action
- Mounting: See mounting section for a selection of mounting options

Please consult factory for other available options not listed.
